JULIE SUMMERS

ABOUT ME

Seasoned professional currently working in the Oil and Gas Industry. Current position as a scheduler requires interfacing with multiple aspects of the trading business and continually working with internal and external counterparts smoothly. Internally, the position is at the meeting point of trading, risk, accounting, hedging and back office internally as well as buyers, sellers, terminals, barge companies and inspectors externally. Continual adaptation to rapidly changing situations and proposing multiple solutions to many problems is a daily activity.

My personal motto is – "It's always great to have a plan A, but you better have plans B, C and D ready". One of my greatest assets is, if I don't know the answer to something, I know how to leverage my resources and networks to find a solution (and several alternatives!). I am looking forward to an opportunity that lets me incorporate my seasoned skills with my newfound ones.
